1. Claims 1-6 and 40-51 are presented for examination.
2. Applicant is requested to identify portions of the specification describing the limitations in the claim and figures representing the claimed invention.
3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-6 and 40-51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - (a) Claim 1, it is not clear what are the relationships among the method steps. A mere collection of unrelated method steps does not present a comprehensive invention.
 - (b) Claim 1, "swapping activity" is an abstract description and does not define a physical operation.
 - (c) Claim 1, it is not clear what is meant by "selectively activating ... memory" as to what aspect of the memory is activated. It is not clear what physical operations are performed by "activating" and "maintaining a status".
 - (d) Claim 2, it is not clear how "activating and inactivating" represent "swapping activities".
 - (e) Claim 3, the limitation is confusing.
 - (f) Claim 4, "being inactive" and "not executing" are not physical signals to respond to.
